

NetworkInnovations

COMPANY PROFILE

SOLVING COMMUNICATIONS CHALLENGES

Network Innovations Inc. specializes in the service and distribution of satellite communications solutions, equipment and airtime. We strive to bring the best solution to meet our customer's need and budget whether you require a simple handheld satellite phone or a turn-key business infrastructure for several thousand people.

Network Innovations is recognized as a world leader in the delivery of reliable, cost-effective satellite telecom solutions to our clients wherever their business may take them on the planet. From the heights of the Himalayas to the dense jungles of Africa, from the ice of Antarctica to the sand of the Sahara, our mission is to help you to Communicate. Anywhere.

NETWORK INNOVATIONS VALUE

Network Innovations provides a suite of mobile and stationary Satellite communications solutions for voice and data to improve communications and business operations resulting in cost savings, faster operational results and improved safety of field staff. Regardless of your location in the field, land or sea, Network Innovations can provide solutions for your voice and data communications.

CAPABILITIES

Network Innovations has a team of resources that work with you to understand your requirements and determine the best solution for your specific needs. Our expert team works with you to design, test, implement and support a satellite communications solution that will help you enhance communications to improve operational results, cost savings, and safety.

We have an experienced, focused and knowledgeable team that can help you determine the best solution for your requirements whether it be voice communications, radio dispatching, video broadcasting, and data communications for asset tracking, SCADA operations or high bandwidth Internet connectivity.

Network Innovations operates a Certified Service Center that provides comprehensive services to our customers for installation, training, repair and maintenance of their satellite communications equipment. Our service department is available on a 24 hour basis every day to support our worldwide customer's operations.

As an integrator we have developed a number of unique service offerings including solutions for crew calling, VOIP and data integration solutions for SCADA operations. Our team is creative and can work with you to integrate the right technologies that will meet your specific needs.

PARTNERSHIPS

Network Innovations represents the worlds leading satellite communications services providers. This allows us to offer the optimal combination of satellite communication products and airtime pricing for each unique requirement. Our partners include:

- France Telecom
- HNS Hughes
- Iridium
