

## World Wide Technology

Established in 1990 and certified as a small, minority-owned business enterprise, World Wide Technology, Inc. (WWT) specializes in helping federal, state and local government customers to rapidly build and deploy their IT infrastructures in an on-time and cost effective manner.

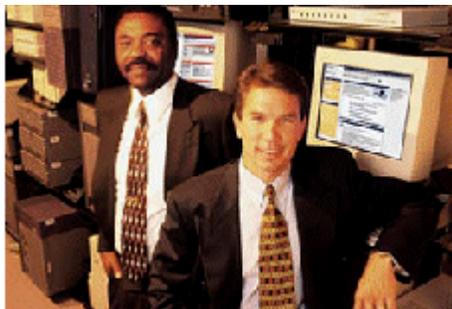

As a Value-Added Reseller, WWT has developed strategic partnerships with global IT leaders, such as Sun Microsystems, Cisco, Veritas, Oracle and Dell Computers. WWT offers a wide portfolio of government contracts from our GSA Schedule, Government Wide Acquisition Contracts (GWAC), and agency specific Blanket Purchase Agreements (BPA). These procurement vehicle choices provide customers with competitive pricing, expedited order processing, on-time delivery, flexibility and multiple manufacturers on our GSA Schedule.

WWT has a dedicated Federal Sales Team that provides customers one-point-of-contact from the Request for Quote (RFQ) to the delivery of IT equipment.

Customers also benefit from real-time customer access to critical information via the web like order status, product availability, up-to-date project status and analytical reporting, including purchase history and supplier performance reports.

In addition, WWT has developed a dynamic electronic Procurement and Logistics (e-PL) solution that provides customers centralized warehousing and distribution, integration services and supply chain management.

“Provide revolutionary supply chain Solutions to our Customers, Suppliers and Partners”

Chairman, Dave Steward, and CEO, Jim Kavanaugh
