OUR COMPANY

Malace Technical Services (MTS) is a privately held professional services company, which supports the automotive, defense, aerospace and medical equipment markets throughout North America. Malace Technical primary services include program management solutions which support the Manufacturing, Engineering, and Information Systems functions within your organization. Malace Technical Services can provide support personnel throughout North America, and have offices in Michigan, Georgia and Alabama.

Engineering

Our Technical Services Division provides personnel which support the design, engineering and administrative requirements of Automotive Part Manufacturers and Automotive Equipment Suppliers. Malace Technical provides staffing solutions for original equipment manufacturers of Engine and Transmission Assembly Equipment, Body Welding Systems, Material Handling, Automation, and Robotics... [more...](#)

Information Technology

Our Information Technology Solutions Division provides a broad range of hardware and software engineering and integration services. Our experienced management team leverages real-world expertise from the commercial and defense sectors to provide tailored solutions that meet the demanding requirements of both markets. Our core expertise includes network design and implementation, software services, and continuity of operations, disaster recovery planning and deployment services. From contract staffing to technology solutions, Malace Technical Services is ready to create a solution that meets your business and mission requirements... [more...](#)

Administrative/Clerical Services

Our Administrative Services Division provides personnel which support the broad range of secretarial, clerical and reception services that allow your organization to operate efficiently. Malace Technical Services offers polished professionals involved in managing, organizing, scheduling and maintaining information for optimum operational efficiency... [more...](#)

Assembly and Manufacturing

Our Manufacturing Services Division provides personnel and project support for the assembly & integration of manufacturing equipment on your floor and at the customer facility. Our services include pipe and wire of equipment, assembly, start-up, debug & production support. We also provide custom programming, training, field service support & skilled trades personnel such as: machine builders, electricians, pipe fitters, robot programmers, welder/fitters, machinists & service technicians... [more...](#)

Human Resource Management

Is your business cyclical in nature requiring the ability to increase your resources on a project/temporary basis? Do you require the flexibility to evaluate an employee's performance before committing to a permanent hire? Malace Technical Services assists companies requiring a flexible workforce accessing the technical, administrative, manufacturing and industrial expertise required to meet their changing HR requirements while maintaining cost certainty in an otherwise uncertain business world...
