Value-Added Five-Star Services

Our highly skilled, factory-direct sales force, along with our innovative designs and industry-leading quality have elevated us to the leadership position in our industry. Our services include:

★ Project Management

To ensure seamless customer care, a dedicated sales representative will see your project through from conception to installation and beyond.

★ Planning Assistance

Our sales representatives will visit you on-site, measure your space, inventory your existing equipment and help you plan for future expansions.

★ Design Services

You'll get a better feel for your proposed system before it's installed with customized, three-dimensional CAD drawings.

★ Installation

Our total service philosophy includes certified Installation Teams so your system is secured with an expert touch. Should you ever need to reconfigure or expand, our installers are available to assist.

★ Quality Guarantee

As part of our service-oriented approach, Wright Line guarantees the products we manufacture for as long as you own them.

Storage Cabinets

Optimedia®, the most flexible, custom configurable filing and multimedia cabinet system available, is designed to store specific media such as files, diskettes, CDs, 4mm or 8mm tapes, data cartridges and more.

Personal storage cabinets feature wardrobe storage and lockable drawers for files and individual items.

For maximum filing density, Optimedia® modular cabinets are space efficient and compatible with LINX® modular wall shelving.

Optimedia® cabinet choices include eight heights, four types of door closures, seven colors and more than 100 components.

Modular Carts

Ideal for all technical applications, TechCart® mobile furnishings are designed for the transportation, storage and ergonomic access of equipment, tools, parts and reference materials.

Employing a broad range of unique and specialized carts, TechCart® provides optimal solutions for training (above) and video conference (left) environments, as well as lab data centers and office grade applications.

performance

Modular Office Furniture

From general office and training room applications to CAD operations and engineering stations, LINX® offers a flexible, reconfigurable and highly ergonomic workplace.

LINX® freestanding worksurfaces and modular storage walls are easily reconfigured to any environment and technology.

Seating

Our broad selection of chairs provides the perfect blend of fashion and comfort, offering the ideal solution for any office environment.

LINX® combines flexible configurations in contemporary styling with a wide variety of fabric and laminate choices.

Wright Line's portfolio of ergonomic, adjustable seating supports the body in a neutral, stress free position.

Training workstations ergonomically integrate monitor, keyboard and CPU within the worksurface, so users can enjoy an unobstructed view of their surroundings.

technology experts

Security and Command Consoles

Wright Line's command consoles offer modular designs appropriate for computer networks and security areas of all sizes.

Created for LCD flat panel display technologies, the Profile™ system is sleek and flexible with interactive monitor arms.

Over 1,000 modular components permit unlimited reconfigurability of your LMS™ system.

Networking, Engineering and Electronic Lab Furniture

Wright Line offers a wide variety of workstation surfaces and components for placement of computers, test equipment and instrumentation, along with a complete line of ESD controls.

TechBench™ can be configured for assembly, testing, and repair.

NetView™ offers rack-mount capabilities on all levels for dispatch and monitoring equipment, 21" CRT monitor capacity and large screen integration.

integration

Enclosure Systems

Wright Line's multi-vendor compatible enclosure systems provide the premier equipment storage solution. Our custom configured designs evolve as your technology needs evolve, ultimately maximizing your investment. And, when coupled with our enclosures, our Integrated Technologies provide unmatched reliability for powering, managing and monitoring all of your equipment.

Vantage™ enclosures deliver custom configured solutions to store your mission critical servers, hubs, routers and other 19" equipment.

Wright Line's cutting edge solutions keep pace with your equipment's increasing power requirements.

Paramount™ enclosure systems allow unlimited reconfiguration possibilities to easily accommodate expansion while managing equipment migration and upgrades.

View 'X' series, a rack-mount LCD display with keyboard, touchpad and integrated KVM (keyboard, video and mouse) switch, provides the most cost effective and complete package in only 1U.

Easily manage your servers with a wide variety of KVM technologies that support multiple platforms.
