About Aderas

Aderas is a small business founded in 2004. Aderas is a provider of professional services supporting the Department of Defense, Federal Civilian Agencies, Commercial Companies, and other technology integrators. Aderas specializes in implementing, extending, managing, and tuning Oracle Enterprise Applications, Databases, Applications servers as well as custom j2ee development. We are located in Reston, Virginia.

Who is Aderas?

Jimmy Nguyen

Jimmy provides years of proven Oracle implementation experience and leadership to Aderas. As a former Oracle Senior Principal Consultant and Big 5 Consultant, Jimmy has worked with cutting edge Oracle technologies throughout his career. He is responsible for the strategic direction and business alliances of Aderas. Jimmy holds a Masters Degree in Systems Engineering from the University of Virginia and a Bachelor of Science in Electrical Engineering from the University of Virginia.

Jason DeLano

Jason provides Aderas with numerous years of Oracle Applications implementation experience. As a former Oracle Senior Principal Consultant, he has provided technical leadership and expertise to some of the largest Oracle Applications implementation (GE, Honeywell, Centers for Medicaid and Medicare Services). Jason is responsible for providing technical and functional expertise on Financials, Service and Manufacturing implementations. He also is responsible for providing High Availability, Disaster Recovery, and Performance leadership to the Aderas team. Jason holds a Bachelor of Science in Computer Science from Siena College.

Brad Rendell

Brad has over 8 years of implementation experience with Interaction Center Technologies. Brad was instrumental in helping to stabilize one of the first referenceable Federal implementations of Oracle Customer Relationship Management 11i. As a former Oracle Principal Consultant in the DoD Consulting practice, Brad worked as a liaison between Oracle Consulting Services (OCS) and Oracle Product Development in implementing Oracle's HealthCare Transaction Base (HTB) framework.
